Language acquisition is the process by which humans acquire the capacity to perceive and comprehend  
language, as well as to produce and use words and sentences to communicate. Language acquisition is one  
of the quintessential human traits, because non-humans do not communicate by using language. Language  
acquisition usually refers to first-language acquisition, which studies infants ...

Today, more of the world's population is bilingual or multilingual than monolingual. In addition to facilitating cross-cultural communication, this trend also positively affects cognitive abilities. Researchers have shown that the bilingual brain can have better attention and task-switching capacities than the monolingual brain, thanks to its developed ability to inhibit one language while ...
