The best-known rat species are the black rat (*Rattus rattus*) and the brown rat (*Rattus norvegicus*). This group, generally known as the Old World rats or true rats, originated in Asia. Rats are bigger than most Old World mice, which are their relatives, but seldom weigh over 500 grams (1.1 lb) in the wild.. The term rat is also used in the names of other small mammals that are not true rats.
