Advanced composite materials (ACMs) are also known as advanced polymer matrix composites. These are generally characterized or determined by unusually high strength fibres with unusually high stiffness, or modulus of elasticity characteristics, compared to other materials, while bound together by weaker matrices. These are termed advanced composite materials (ACM) in comparison to the composite ...

1. Introduction. 3D printing, also referred to as additive manufacturing(AM), rapid prototyping(RP), or solid-freeform(SFF), is a “process of joining materials to make objects from 3D model data, usually layer by layer”™ , which was first described in 1986 by Charles Hull .This technology creates objects by adding materials to reduce waste while reaching satisfactory geometric accuracy .
