Food Science, An Ecological Approach

In this text, we consider food science within the context of the natural world we live in today. Although many of the scientific principles remain the same as for traditional food science, they must be viewed through a new lens when we assume this perspective. To take an “ecological approach,” our study of food science must be linked to ...

Food Science in an Era of Environmental Concern

“Ecology and the abiotic environment ecology” introduction and terms o ecology = how organisms interact with one another and with their environment o environment = biotic (other organisms) and abiotic (physical factors) natural selection “adaptation soils and nutrients climate” Four levels of ecological organization:
