Editor war is the common name for the rivalry between users of the Emacs and vi (usually Vim) text editors. The rivalry has become a lasting part of hacker culture and the free software community.. The Emacs vs vi debate was one of the original "holy wars" conducted on Usenet groups, with many flame wars fought between those insisting that their editor of choice is the paragon of editing ...

Hey guys, I'm back... with an even bigger list of my top choices for macro-friendly items from the main chain restaurants in America! Just like the IIFYM Fast Food Master List, these picks are all the highest protein/lowest carb/lowest fat choices (for the most part) that actually sound like they taste good. This list is also a fluid document that I will add to and take from, so please email me ...

In computer programming, an indentation style is a convention governing the indentation of blocks of code to convey program structure. This article largely addresses the free-form languages, such as C and its descendants, but can be (and often is) applied to most other programming languages (especially those in the curly bracket family), where whitespace is otherwise insignificant.
