Background. Genetic engineer Ananda Mohan Chakrabarty, working for General Electric, had developed a bacterium (derived from the Pseudomonas genus and now known as Pseudomonas putida) capable of breaking down crude oil, which he proposed to use in treating oil spills. General Electric filed a patent application for the bacterium in the United States listing Chakrabarty as the inventor, but the ...

Stress is the force per unit area on a body that tends to cause it to change shape.. Stress is a measure of the internal forces in a body between its particles. These internal forces are a reaction to the external forces applied on the body that cause it to separate, compress or slide. External forces are either surface forces or body forces. Stress is the average force per unit area that a ...

Postcolonial literature is the literature by people from formerly colonized countries. It exists on all continents except Antarctica. Postcolonial literature often addresses the problems and consequences of the decolonization of a country, especially questions relating to the political and cultural independence of formerly subjugated people, and themes such as racialism and colonialism.
