

management information systems laudon pdf

A management information system (MIS) is an information system used for decision-making, and for the coordination, control, analysis, and visualization of information in an organization; especially in a company.. The study of management information systems examines people, processes and technology in an organizational context. In a corporate setting, the ultimate goal of the use of a ...

Management information system - Wikipedia

The "classic" view of Information systems found in the textbooks in the 1980s was a pyramid of systems that reflected the hierarchy of the organization, usually transaction processing systems at the bottom of the pyramid, followed by management information systems, decision support systems, and ending with executive information systems at the top. . Although the pyramid model remains useful ...
