The use of space mirrors as an anti-global warming measure is a proposed technology for climate change mitigation by deflection of sunlight. It was one of a series of proposals for controlling global warming made to the United States government in 2001.. At the "Response Options to Rapid or Severe Climate Change" round-table meeting organized by the President's Climate Change Technology ...

### **Space mirror (climate engineering) - Wikipedia**

A mirror is an object that reflects light in such a way that, for incident light in some range of wavelengths, the reflected light preserves many or most of the detailed physical characteristics of the original light, called specular reflection. This is different from other light-reflecting objects that do not preserve much of the original wave signal other than color and diffuse reflected ...
