Learn the basic concepts of coding to enrich your understanding of how to define and control computers and softwareâ€”without needing to know a specific programming language. This course covers the principles of programming and explains functions, values, variables, and parameters used to define actions. Capturing input from users, creating conditional tests, using loops with arrays, and ...

Ecology; Ecology addresses the full scale of life, from tiny bacteria to processes that span the entire planet.

Ecologists study many diverse and complex relations among species, such as predation and pollination. The diversity of life is organized into different habitats, from terrestrial (middle) to aquatic ecosystems.
