Languages are a fundamental aspect of people's lives and the democratic functioning of society. In response to the needs identified in or by its member states, the Council of Europe has been working over the past few decades to compile a set of resources made available to education authorities and professionals and benefiting all Europe's citizens (see milestones).

The Simplified Spelling Board was an American organization created in 1906 to reform the spelling of the English language, making it simpler and easier to learn, and eliminating many of what were considered to be its inconsistencies. The board operated until 1920, the year after the death of its founding benefactor, who had come to criticize the progress and approach of the organization.

1. Introduction. Nanocomposites are composites in which at least one of the phases shows dimensions in the nanometre range (1 nm = 10⁻⁹ m). Nanocomposite materials have emerged as suitable alternatives to overcome limitations of microcomposites and monolithics, while posing preparation challenges related to the control of elemental composition and stoichiometry in the nanocluster phase.
