Secondary surveillance radar (SSR) is a radar system used in air traffic control (ATC), that not only detects and measures the position of aircraft, i.e. bearing and distance, but also requests additional information from the aircraft itself such as its identity and altitude. Unlike primary radar systems that measure the bearing and distance of targets using the detected reflections of radio ...

Vessel Monitoring Systems (VMS) is a general term to describe systems that are used in commercial fishing to allow environmental and fisheries regulatory organizations to track and monitor the activities of fishing vessels. They are a key part of monitoring control and surveillance (MCS) programs at national and international levels. VMS may be used to monitor vessels in the territorial waters ...

Abstract: The impact that high concentrations of ice particles at cruise altitudes have on jet engines will be described, looking at the physical phenomena that lead to ice accretion and engine damage. The contrast with icing associated with supercooled water is emphasised. A brief history of the ice crystal problem is discussed and what options there are for the future.

Baron Guy de Rothschild, of France, has been the leading light of his bloodline. The Baron is an Illuminati Kingpin and slave programmer. For those who have bought the cover story that the Catholic Church is not part of the Illuminatiâ€™s NWO, I would point out that the Baron has worked with the Pope in programming slaves.

This is a discussion of the various abuses of power which have been exhibited by the US government, often under the guise of 'fighting terrorism' or some other popular goal. Includes news articles about the abuse of power and the perpetuation of government agencies which have too much power, too little restraint, and too many bad ideas.
