

### **social engineering the science pdf**

Social engineering, in the context of information security, refers to psychological manipulation of people into performing actions or divulging confidential information. This differs from social engineering within the social sciences, which does not contain the divulging of confidential information.

### **Social engineering (security) - Wikipedia**

Social science is a category of academic disciplines, concerned with society and the relationships among individuals within a society. Social science as a whole has many branches, each of which is considered a social science. The social sciences include, but are not limited to: anthropology, archaeology, communication studies, economics, history, human geography, jurisprudence, linguistics ...

We show, via a massive ( N = 689,003) experiment on Facebook, that emotional states can be transferred to others via emotional contagion, leading people to experience the same emotions without their awareness. We provide experimental evidence that emotional contagion occurs without direct interaction between people (exposure to a friend expressing an emotion is sufficient), and in the complete ...
